ROCK THE ARENA

Live Meet Gamification & Fan Engagement Module

Rock the Routine 2.0 — Feature Implementation Specification

Project: Adobe Red Rocks AI Innovation Challenge 2026
Parent Platform: Rock the Routine 2.0
Module: Rock the Arena
Priority: High-value competition prototype enhancement
Presentation: Friday, November 6, 2026
Document Type: Product Requirements & AI Development Handoff

---

1. EXECUTIVE SUMMARY — WHAT, WHY, HOW

WHAT ARE WE BUILDING?

Rock the Arena is a live, interactive, mobile-first fan engagement experience inside the existing Rock the Routine platform.

It allows fans to participate in quick games during Red Rocks gymnastics meets, collect digital athlete cards, unlock experiences, discover athlete stories, interact with sponsor campaigns, and support Red Rocks NIL funding.

The experience combines two primary components:

1. Live Meet Game

A gamified experience where fans answer trivia, complete rotation challenges, collect athlete cards, earn points, and participate in collective fan milestones.

2. Meet-Night Spotlight

A dedicated content area showing athlete stories, sponsor promotions, short videos, approved fundraising goals, WRTH membership opportunities, and campaign calls to action.

The game maintains fan engagement.

The spotlight converts that attention into measurable athlete exposure, sponsorship value, and supporter revenue.

WHY ARE WE BUILDING IT?

The existing Rock the Routine fan experience supports athlete discovery and supporter conversion but may not provide a compelling reason for fans to return consistently.

Rock the Arena addresses this by integrating engagement directly into the meet experience.

Instead of fans visiting the platform only when they want to donate or explore an athlete, they can participate throughout a meet.

This creates recurring opportunities to:

- Introduce lesser-known athletes.
- Build athlete followings.
- Encourage digital trading card collection.
- Increase fan participation.
- Promote sponsor-supported campaigns.
- Convert engaged fans into WRTH supporters.
- Generate measurable sponsor activation opportunities.

HOW DOES IT GENERATE NIL REVENUE?

Meet attendance → Live gameplay → Athlete discovery → Fan engagement → Supporter conversion.

Additionally:

Sponsor-supported challenges → Branded engagement → Measurable campaign results → Sponsorship revenue and potential renewals.

The experience should produce measurable commercial opportunities rather than functioning solely as entertainment.

---

2. PRODUCT POSITIONING

Product Name: Rock the Arena

Parent Product: Rock the Routine 2.0

Tagline: Every Rotation. Every Fan. Every Routine.

Primary Goal: Turn meet-night fan attention into athlete engagement and NIL revenue opportunities.

Secondary Goals:

- Increase time spent interacting with athlete content.
- Encourage repeat participation throughout meets.
- Create full-roster discovery.
- Strengthen sponsor activation opportunities.
- Increase membership conversion.
- Provide measurable fan engagement data.

PRODUCT PRINCIPLES

1. Mobile-first.
2. Quick interactions that do not distract fans from the meet.
3. Free gameplay.
4. No gambling or monetary wagering.
5. No donation-based leaderboard advantages.
6. Athlete-first storytelling.
7. Commercially valuable sponsor placements.
8. Clear sponsor disclosures.
9. Optional, non-intrusive fundraising opportunities.
10. Consistent integration with Rock the Routine's existing design system.

---

3. PLATFORM INTEGRATION

Rock the Arena must be implemented as a feature inside Rock the Routine 2.0.

Do not build a separate disconnected application.

Recommended Routes

`/live`

- Main meet-night game experience.

`/live/cards`

- Digital athlete card collection.

`/live/rewards`

- Fan achievements and progress.

`/live/leaderboard`

- Optional fan leaderboard.

`/live/meet`

- Current meet information.

`/team/live`

- Authorized staff management interface.

`/team/live/analytics`

- Meet-night engagement and revenue analytics.

Existing Features to Reuse

- Athlete profiles.
- Story Seed videos.
- Digital trading cards.
- Fan accounts.
- Supporter contribution flow.
- Sponsor records.
- Impact Routines.
- Campaign content.
- Shared event tracking.
- Admin revenue dashboard.
- Existing authentication and role permissions, where implemented.

Important: Inspect the existing repository before creating new routes, tables, or components. Reuse working features and avoid duplicating athlete, fan, sponsor, or revenue records.

---

4. MAIN USER EXPERIENCE

PAGE 1 — ROCK THE ARENA LIVE HUB

Route: `/live`

Purpose

Provide one central destination for fans to participate in meet-night activities.

Visual Structure

Desktop Layout

- Left area: Approximately 70% width.
- Right area: Approximately 30% width.

Left:

- Meet information.
- Current rotation.
- Live game.
- Fan points.
- Available challenges.
- Digital card progress.
- Collective milestones.

Right:

- Meet-Night Spotlight.
- Athlete story.
- Sponsored content.
- Fundraising goal.
- Optional supporter action.

Mobile Layout

Use a single-column layout.

Recommended order:

1. Compact meet status.
2. Current challenge.
3. Challenge feedback.

4. Athlete Spotlight.
5. Card collection progress.
6. Sponsor or WRTH support feature.
7. Bottom navigation.

The main challenge must be visible without requiring excessive scrolling.

Header

Display:

ROCK THE ARENA

Red Rocks Meet Night

Current Rotation: 2 of 4

Status: DEMO LIVE / LIVE / UPCOMING / COMPLETED

User Metrics

- Points earned.
- Challenges completed.
- Cards collected.
- Current meet progress.
- Optional participation streak.

Navigation

- Play
- Cards
- Meet
- Rewards
- Support

Required Interactions

- Start challenge.
- Submit answer.
- Display correct/incorrect result.
- Award eligible points.
- Update card progress.
- Open athlete story.
- Navigate to supporter flow.
- View sponsor campaign.

- Advance meet rotation when triggered by authorized staff.

---

5. GAME 1 — ROUTINE IQ

Priority: P0 — Required for Friday.

Description

Short gymnastics trivia challenges appear throughout the meet.

Questions should be educational, entertaining, and quick to answer.

Example Question

Which gymnastics apparatus features a beam approximately 10 centimeters wide?

A. Vault

B. Balance Beam

C. Floor Exercise

Correct answer: B.

Game Logic

- Display one question at a time.
- Allow one answer submission per challenge.
- Correct answer awards points.
- Incorrect answer displays an explanation.
- Prevent repeated points from refreshing the page.
- Record challenge completion.
- Provide an optional next challenge.

Illustrative Points

Correct answer: 100 points.

Incorrect answer: 0 points.

Participation milestone: Optional 25-point bonus.

Data Requirements

Each question contains:

- Question ID.
- Question text.
- Answer options.
- Correct answer.
- Explanation.
- Rotation ID.
- Active status.
- Points available.

Revenue Connection

The game may be sponsored as a branded experience.

Example:

"Tonight's Routine IQ challenge is presented by [Sponsor]."

Sponsor placement must be clearly identified.

Game participation should not require purchasing a product, donating, or visiting a sponsor website.

---

6. GAME 2 — COLLECT THE ROSTER

Priority: P0 for a basic collectible unlock.

Description

Fans can discover and collect digital athlete cards throughout the meet.

Each rotation can feature one or more athletes.

User Experience

1. A featured athlete becomes available.
2. Fan completes a short eligible challenge.
3. A digital trading card unlocks.
4. Card reveal animation plays.
5. Fan can view athlete story.
6. Card is saved in the user's collection.
7. Fan can discover additional athletes.

Card Contents

- Athlete image.
- Name.
- Gymnastics specialty.
- Short personal story.
- Interests.
- Collection identifier.
- Link to approved athlete profile.

Full-Roster Discovery

Encourage fans to discover athletes across the roster.

Do not default to follower count or popularity rankings.

Revenue Connection

- Increased athlete exposure.
- More athlete profile views.
- Fan follow opportunities.
- Optional supporter conversion.
- Sponsor-supported card releases.

Cards should be free to collect in the primary game experience.

---

7. GAME 3 — CROWD CHALLENGES

Priority: P1.

Description

Fans collectively work toward shared participation milestones.

Example

"Red Rocks fans have completed 650 of 1,000 challenges tonight."

When 1,000 eligible challenges are completed, unlock a pre-approved digital experience.

Possible Rewards

- Athlete thank-you video.
- Digital badge.
- Special athlete collectible.
- Behind-the-scenes story.
- Sponsor-supported fan content.

Rules

- Rewards should not depend on gambling.
- Monetary contributions must not provide competitive advantages.
- Collective goals should count legitimate participation.
- Staff should approve reward content before publication.
- Do not imply fans control competitive athlete performance.

Revenue Connection

Sponsor-funded crowd participation challenges can become a measurable activation product.

---

8. GAME 4 — GUESS THE ATHLETE

Priority: P1.

Description

Fans answer clues about participating athletes.

Example

"This gymnast enjoys mentoring younger athletes and wants to promote youth confidence."

Answer: Avery Davis.

Avery is a fictional athlete used for the prototype.

Experience

- Display a personal-interest clue.
- Show three athlete choices.
- User selects an athlete.
- Correct answer reveals the athlete card.
- User can follow or explore the athlete profile.

Revenue Connection

Improves athlete discovery and may generate more relevant athlete-sponsor engagement opportunities.

---

9. GAME 5 — ROTATION MISSIONS

Priority: P2 for the competition; optional future release.

Description

Each apparatus rotation unlocks a themed mini-mission.

Example Rotation Missions

Vault:

- Complete a quick trivia challenge.

Bars:

- Discover an athlete's story.

Beam:

- Answer a gymnastics knowledge question.

Floor:

- Participate in a collective fan challenge.

Completion Reward

A digital Meet Night Champion card or badge.

Important

Use approved meet schedules or staff-controlled rotation changes.

Do not claim live scoring integration unless it actually exists.

---

10. MEET-NIGHT SPOTLIGHT

Priority: P0.

Purpose

Provide a content and commercial engagement area alongside the live game.

This is the primary space for:

- Athlete storytelling.
- Sponsor promotions.
- Campaign creative.
- WRTH support opportunities.
- Fundraising progress.
- Membership conversion.

Desktop Placement

Right-hand sidebar alongside the game.

Mobile Placement

Compact content cards between challenges or beneath the main challenge.

Content Types

TYPE A — ATHLETE SPOTLIGHT

Display:

- Athlete image.
- Name.
- Short story.
- Video thumbnail.
- Follow Athlete CTA.
- View Profile CTA.

Example:

BEHIND THE ROUTINE

Meet Avery Davis.

Discover what confidence means to her beyond the competition floor.

CTA: Watch Avery's Story.

TYPE B — SPONSORED SPOTLIGHT

Display:

- Sponsor identification.
- Approved campaign creative.
- Commercial message.
- Athlete participation, where applicable.
- Sponsor campaign CTA.

Example:

SPONSORED SPOTLIGHT

Built for the Moment.

Discover how three athletes prepare for performance.

CTA: Explore the Campaign.

TYPE C — WRTH SUPPORT SPOTLIGHT

Display:

- WRTH information.
- Approved support goal.
- Supporter options.
- Athlete-focused message.
- Optional contribution CTA.

Example:

BACK THE ROUTINE

Help create more opportunities for Red Rocks gymnasts.

Join the existing supporter community.

$10/month | $25/month.

CTA: Become a Supporter.

TYPE D — FUNDRAISING PROGRESS

Display:

- Fundraising campaign title.
- Verified or simulated goal.
- Progress indicator.
- Number of supporters, if known.
- Support CTA.

For the prototype, clearly label all sample amounts as simulated.

TYPE E — MEET MILESTONE

Display:

- Current fan challenge progress.
- Upcoming reward.
- Featured athlete card.
- Participation CTA.

Spotlight Rotation Logic

Recommended behavior:

- Do not autoplay videos with sound.
- Rotate static content at controlled intervals or when the user advances.

- Prioritize relevance to the current rotation.
- Allow users to dismiss promotional content.
- Label sponsored placements.
- Avoid interrupting active challenges.
- Maintain an easy path back to the game.

Suggested Content Balance

For the prototype, use:

- 40% athlete storytelling.
- 25% sponsor campaign content.
- 20% supporter/fundraising content.
- 15% game milestones.

These are design guidelines, not validated optimization ratios.

---

11. SPONSOR COMMERCIAL MODEL

New Product: Meet-Night Partner

Create a sellable sponsor activation package inside Rock the Routine.

Illustrative Package

MEET-NIGHT PARTNER — $5,000

Proposed components:

- Sponsored Routine IQ challenge.
- Branded Meet-Night Spotlight placement.
- Approved athlete content collaboration.
- Sponsor campaign landing page.
- Campaign-specific tracking link.
- Post-event performance report.

Sponsor Benefits

- Exposure to engaged event followers.
- Athlete-associated content, if properly contracted.

- Measurable digital participation.
- Trackable sponsor calls to action.
- Opportunities for repeat activation.

Important Financial Distinction

The $5,000 proposed package is a total illustrative commercial price, not automatically $5,000 of athlete NIL funding.

The actual agreement should distinguish:

- Athlete NIL compensation.
- Content production cost.
- Event activation expenses.
- Technology/servicing expenses.

For example, an illustrative $5,000 package might allocate:

- $3,500 athlete NIL compensation.
- $750 creative production.
- $500 activation.
- $250 technology/servicing.

These allocations are hypothetical and require operational review.

Sponsor Analytics

Track:

- Sponsored challenge impressions.
- Challenge starts.
- Completions.
- Sponsor spotlight views.
- Sponsor CTA clicks.
- Offer claims.
- Relevant attributable conversions.
- Campaign-specific performance.

Avoid representing an impression or click as a guaranteed business sale.

---

12. SUPPORTER CONVERSION

Purpose

Allow gameplay to create opportunities for voluntary financial support.

Fan Journey

1. Fan enters a meet-night challenge.
2. Fan discovers an athlete.
3. Fan watches an optional story.
4. Fan sees a WRTH support option.
5. Fan chooses to learn more.
6. Fan enters approved contribution flow.
7. Supporter confirmation is recorded when appropriate.

Friday MVP

Use a clearly simulated $10 contribution.

The contribution should trigger:

- Confirmation screen.
- Demo transaction record.
- Dashboard update.
- Updated simulated funding totals.

Production Requirements

Use an authorized WRTH payment provider or referral workflow.

Do not create an independent live payment system without authorization.

Ethical Design

- No pressure to donate.
- No loss of game access for non-donors.
- No purchase-based leaderboard boosts.
- No misleading fundraising urgency.
- No unverified tax-deductibility claims.

---

13. ADMIN EXPERIENCE

Recommended route: `/team/live`

Purpose

Allow authorized personnel to manage meet-night engagement and content.

Staff Controls

- Create meet event.
- Set current rotation.
- Activate/deactivate trivia questions.
- Assign featured athletes.
- Approve Spotlight content.
- Assign sponsor placements.
- Activate crowd milestones.
- Set approved fundraising goals.
- Monitor game activity.
- Review sponsor performance.
- Export reports.

Friday MVP

Implement a lightweight simulation controller with:

- Start Demo Meet.
- Advance Rotation.
- Activate Challenge.
- Change Spotlight Content.
- Reset Demo.

Do not build a full enterprise operations interface before Friday.

---

14. ADMIN ANALYTICS

Recommended route: `/team/live/analytics`

Required Dashboard Metrics

Game Engagement

- Unique participants.
- Challenge starts.
- Challenge completions.
- Average completed challenges.
- Cards collected.
- Athlete profile visits.
- Repeat participation.

Fan Conversion

- Supporter CTA impressions.
- Supporter CTA clicks.
- Simulated contributions.
- New opt-in followers.
- Conversion rate.

Sponsor Performance

- Sponsored challenge impressions.
- Sponsored challenge completions.
- Sponsor Spotlight views.
- Sponsor link clicks.
- Offer claims.
- Attributable outcomes where available.

NIL Funding

Keep separate:

- Sponsor opportunity value.
- Signed sponsorship funding.
- Collected sponsorship funding.
- New fan contributions.
- Existing supporter revenue.
- Activation costs.
- Athlete NIL compensation.

Friday MVP

Use simulated but internally consistent data.

Every live judge action should update the correct event record.

---

15. DATABASE & DATA MODEL

Reuse the parent platform's shared records.

Required Data Relationships

- One meet has multiple challenges.
- One meet has multiple Spotlight content records.
- One fan can complete multiple distinct challenges.
- A challenge may award points only once per eligible fan.
- One fan may collect multiple athlete cards.
- One sponsor may support multiple meet activations.
- Each sponsor activation may link to a campaign.
- Financial events must use the parent platform's revenue ledger.

Data Safety

Use anonymous or pseudonymous event tracking where practical.

Collect identifiable fan information only when necessary and with appropr
